Nxt Gen Projects

OUR Services

You Have a Need
WE HAVE A Solutions TO GET YOU THERE.

Entitlement

We start out all projects identifying any jurisdictional requirements that may be placed on a project, including any public hearings that may be required for zoning, special use permits, zoning adjustments that may be desired or required. We define the capacity of the site, setbacks, zoning requirements and limitations, and required presentations to neighborhood associations. Every location will have different requirements. Before any design work begins, the necessary due diligence is required.

Architectural Design

The way we design does not follow a rigid formula or cookie cutter process. We question everything during the process and are always looking for better materials, methods and options. We work directly with the client in a collaborative effort to meet their needs and achieve their goals.

Project Execution

During the construction period, we make ourselves available to the contractor to answer any questions and address any concerns they may have. We are involved during the construction to represent the owner and to respond to any contractor RFI's, to conduct site observation visits, to monitor progress, to prepare any required change orders, to review shop drawings and pay applications.

Our Process

**EVERY PROJECT IS DIFFERENT.
BUT OUR WAY OF THINKING STAYS THE SAME.**

Listen

We listen to our clients and their needs for expertise. We pay close attention to what's right and relevant.

Empathize

We always put our clients at the center of our strategy so our work can create real benefits for them

Anticipate

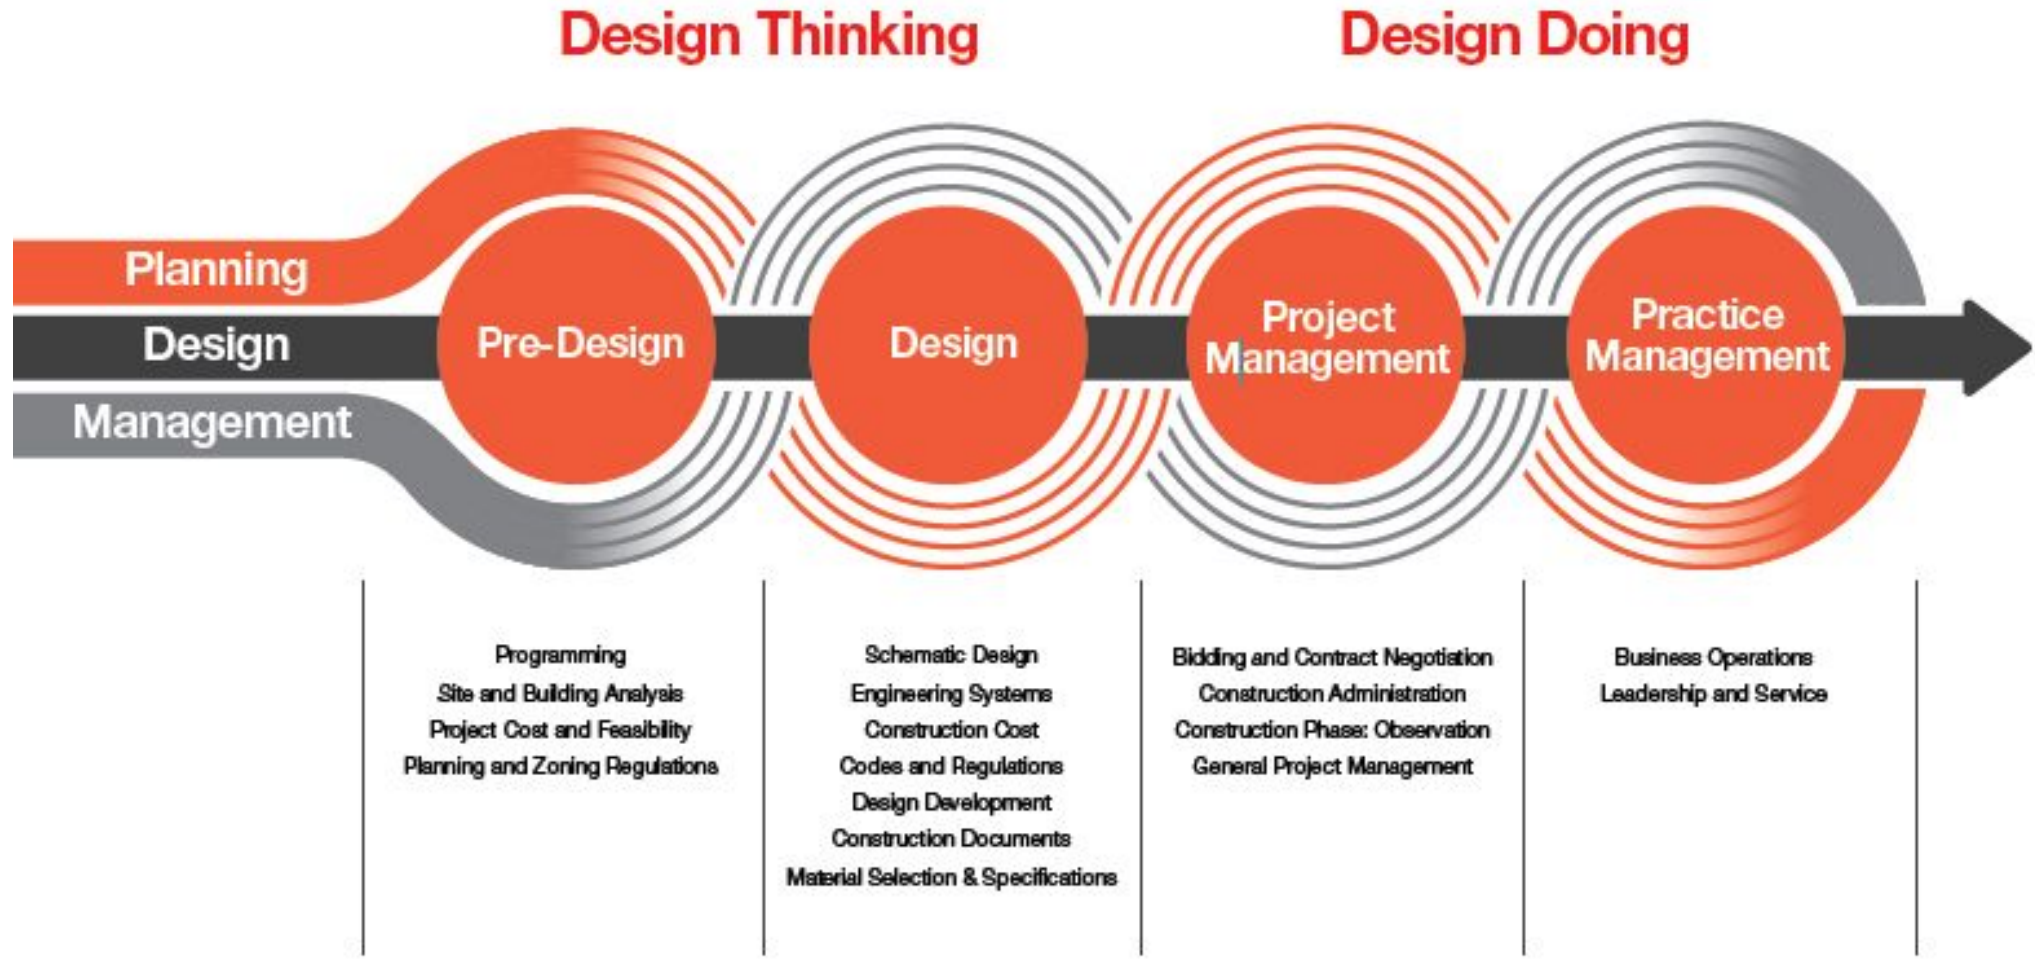

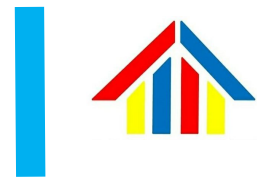

We think not only about what clients say they want, but also how we can anticipate their needs and make the architectural design better.

Collaborate

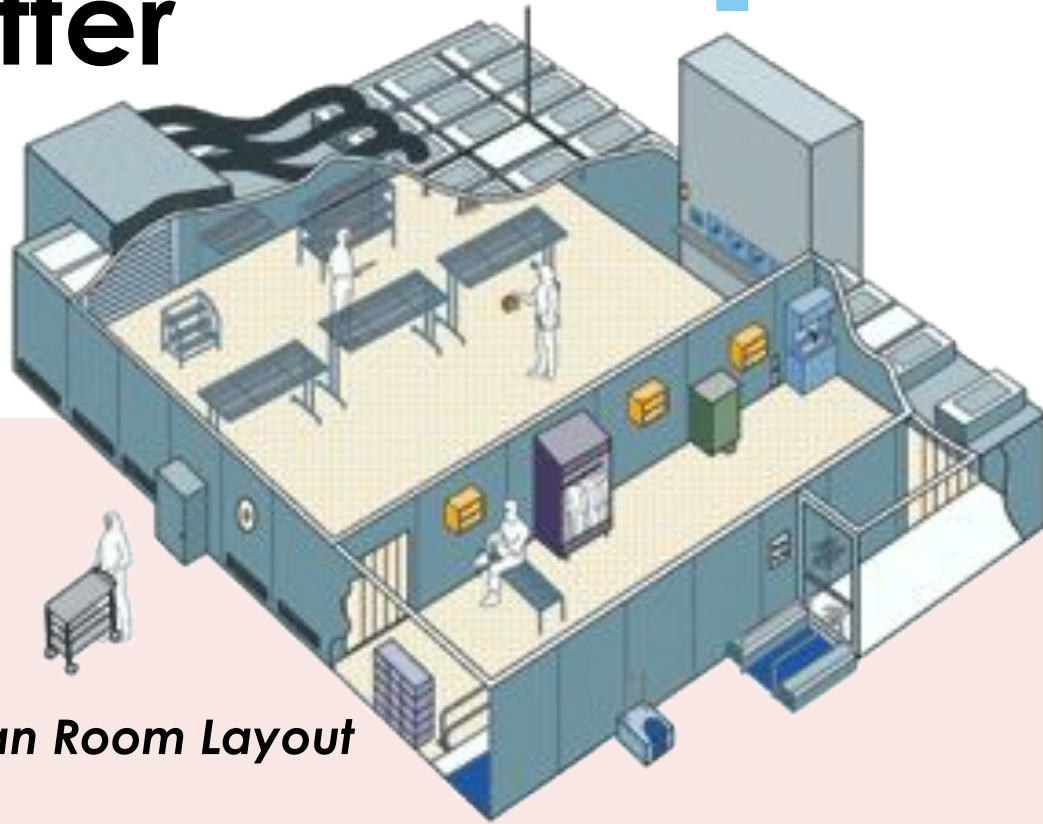

Great ideas can come from anywhere, so we and our engineering and construction partners work together as one team.

How we work

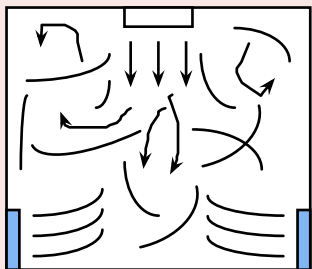

Services We Offer

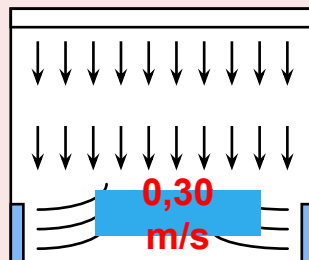

Clean Room Layout

Importance Of Air flow Patterns

Turbulent

Uni-directional / laminar

Clean Room for Pharma Industry, Automobile Industry, FMCG & Many More

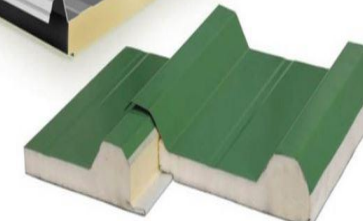

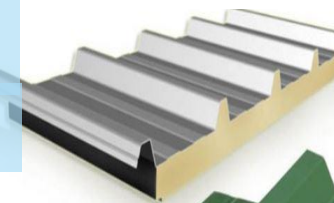

Considerations in Clean Room Design

- Temperature/Humidity control
- Pressure Balancing
- Waste Management
- Energy Efficiency
- Clean Room Classification
- Air Management
- Contamination Control

TURNKEY SUPPLIER

1. Air Handling Units
2. Ducting (GSS Construction)
3. Duct Insulation
4. HEPA Filters (Hooded Type)
5. Condensing Units with Green refrigerant
6. Standalone Electrical Panels
7. Puff Panel with 3-D cornering, coving.
8. Epoxy flooring (ESD Flooring)
9. Industrial Doors
10. Clean room accessories
11. Cleanroom Validations with Certification
